

Summer School and Tools!

Attention Female-Identifying Students!
*Want to try a skilled trade and develop your
technological skills and design sense?*

This July, KPRDSB is offering Grade 9 Exploring Technologies (TIJ1O1) at Cobourg Collegiate Institute. Female-identifying students will have the opportunity to build their design thinking skills all while using tools, developing confidence and having fun. As part of the course, students will participate in Mind Over Metal Camp, sponsored by the CWB Welding Foundation. Hands-on learning at this camp helps build self-esteem and sparks interest in a rewarding skilled trade fuelled by creativity. Register through the link or QR code below.
