

Summer School and Tools!

Attention Female-Identifying Students!
Want to try a skilled trade and develop your technological skills and design sense?

In July 2025, KPRDSB is offering Grade 9 Exploring Technologies (TIJ1O1) at each of our summer school campuses in Clarington, Northumberland and Peterborough. Female-identifying students will have the opportunity to develop skills and design thinking techniques all while using tools and exploring apprenticeship pathways leading to careers in the skilled trades.

There are a limited number of spots available for this opportunity. Registration in the course at each location will be on a first-come-first-served basis. Please complete the [Google form](#) in order to register your interest.
